

James Miller testimonial transcript

Hello. I'm recording this video for you today. Yeah, for you. I am, I'm recording it for you. So here's why.

You just talked to Erin Pheil. You loved her, she's really fun. She's high energy, she's great.

And then she told you how much her program costs, and you freaked out, right?

I know, I did. I really did.

Man, every single bad thing you can think about the money, every single piece of the broke thinking that comes with it, hit me.

Oh my gosh, I can't afford that. How's that gonna work? That's way too much money.

All those, all those, every bit of that head trash was right here.

So why am I recording this video for you?

Well, because I wanted to ask you a question, one that I asked myself.

The question was, what if?

What if Erin's program would bring me what she promised me it would?

What if I could get the heck out of my own way?

What if doing the MindFix program would help my life?

What if it would drag me out of or at least make it easier for me to get out of the massive freaking hole I had put myself in?

What kind of a hole?

\$500,000 worth of unsecured debt for my business. I had creditors calling me three and four times a day. All of my accounts were shut down. I had people knocking on my door.

I had, you name it, I had it.

And let's be honest, that far in part of my thinking was what's a few thousand dollars more, right? I mean, really, I thought that.

But another part of me thought, what if I gambled on Erin?

What if I gambled on the MindFix program and it actually paid off?

And so you know what? I decided to invest in myself, I decided to gamble on her, on her program, and most importantly, on me.

My name is James Miller. And I'm recording this video for you, because whatever you're thinking, odds are good, I was in a worse spot than you were.

And let me tell you, it is the best thing I have ever done. The best thing.

It has allowed me to grow at an exponential rate compared to what I was doing.

And I had been busting my tail, for the last year, I have been busting my tail to drag myself and my company up out of the hole that I created for it.

And I was doing it. But it was hard. It was so hard, and then to constantly have to overcome the head trash associated with it, to be up for my team to be like, "No guys, we're good."

Even inside, even though inside I'm like, ah, right?

That was so freaking hard.

Erin's program made it so easy. It is so easy.

I'm really glad she didn't tell me how easy it was because I don't know that I would have believed it.

But I'm recording this video today, because I want you to ask yourself that question.

What if?

What if what you invest with Erin would come back tenfold?

What if it would?

For me at this point, I would happily pay double.

I'll tell you a quick story.

About halfway through the program, early in the morning 7 a.m. or so, one of the coaches and I are going through and we're clearing out some old money beliefs, we're clearing some beliefs around, we're removing to be more clear.

Okay, we're removing those false beliefs, we're removing the beliefs around my worthiness and my capability and how people are judging me, and all of those other things, right?

All that head trash, we're getting rid of it. And I don't think much of it.

But less than eight hours later that day, you know what that meant for me?

That meant that my company collected an extra, extra \$4,000 more than I would have that day, had we not cleared those things out and remove them.

No joke.

Because I figured up a couple of bills, they were too much.

And I started like I went down that path of oh my gosh, I've gotta reduce them they don't.

But guess what we'd removed all those beliefs, we'd removed the emotional attachment to that and all of those other things.

And so I was able to write out those bills the way that they were, I handed them to those clients. And they went, "Oh, that's more than I was thinking."

In the past, I would have been like, "I know, I know, I'm sorry, how much do we need to take off to make you happy? I wanna make sure you're happy."

You know what I did this time? I said, "I know, right? It's way more than I was thinking too."

And then I shut up.

And both of those people came back and said, "You know what? We asked you to do the work, you guys did more than we asked you to do. We're happy to pay it, here's your check."

In less than eight hours, after a 30 or 40 minute session with one of the coaches, I brought in an extra 4000 bucks. Now, how much is that worth over the next couple of decades?

Who knows? Hundreds of thousands, maybe millions.

And I'm not joking.

Because all of that crap I was fighting is gone. It's freakin gone.

And it's easy.

So here's what I wanna tell you today. Gamble. Gamble on you. Gamble on you,

Invest in yourself. Take a gamble, invest with Erin Pheil with the MindFix program.

And you will not be sorry.

And when you do, I would love to hear your story. Because I am in love with the transformation that gets to take place doing this kind of stuff.

I absolutely love it. It is the best thing you will ever do.

Trust me.

Thanks so much for watching.

I can't wait for you to talk to Erin again and pull the trigger on this thing because I'm telling you, your life is about to get so freakin awesome.

Talk to you later.
